Intro

Top Quality of Walther

Tradition of Innovation

The motto does express it: Walther has 130 years of experience in the design and production of innovative weapons.

The model PPK, the first pistol with single and double action, the original as well as the replica, is still the leader of the firearms-market. Not only in the past, but also today, the most innovative products come from Walther. The Walther P 99 is still a highlight in the development of pistols for the last 20 years. The P99 is the first hammerless pistol with which can be shot single action, as well as double action.

Walther also points the way to the future in the International Competitive Shooting disciplines. Our target pistols are ranked as the best ones since Competitive Shooting became

an olympic event. All Walther pistols are optimally matched with the needs of our clients. The law enforcement weapons distinguish themselves by robustness, easy handling, long duration of life and high reliability, the competition weapons on the other hand excel with their noteworthy precision and their ergonomic form.

The joint venture between Walther and Umarex created new synergies and furthered future prospects. We manufacture law enforcement weapons, weapons for all olympic disciplines, personal protection usage, and for leisure activities.

Today, most of the sports associations in the International Shooting community already trust and rely on Walther weapons. Walther will continue to offer high-tech products, perfect service, and product excellence in the future for its clients, based on more than 100 years experience.

P99

For more than 100 years, Walther has created major breakthroughs in the development of pistols. Many have become legendary, including the P99. This pistol meets all safety standards of weapons today. The P99 is safe and simple to operate, with significant advantages over other semi-automatic pistols.

Safety Through Control

Loading and cocking indicators that can be felt and seen at anytime informing the operator about the "ready-to-fire" status of the weapon. During numerous tests including exposure to extreme temperatures, hostile environments and firing a wide spectrum of ammunition, the functional reliability of the P99 has been proven.

Decocking Lever

The decocking lever allows safe decocking of the striker and acts as a safety. By integrating it into the slide, any snagging on clothing is prevented.

Loaded Chamber Indicator

Unloaded: the extractor is flush with the slide.
Loaded: the extractor is recessed in the slide and a red mark is visible.

Cocking Indicator

Decocked: the striker is recessed into the slide end cap.
Cocked: the striker can be felt extruding from the slide end cap and displays a red mark.

Grip

Three interchangeable backstraps made from shock absorbant material are provided to fit individual hand sizes.

- 1 Trigger Safety
- 2 Trigger
- 3 Trigger Bar
- 4 Striker Safety
- 5 Striker
- 6 Let-off
- 7 SA Lever
- 8 SA Sear

The System

The P99 was developed according to the stringent specifications of the Technical Commission of the German Police Academy (Pflichtenheft der deutschen Polizei-Akademie). The P99 offers a combination of features unique to Walther pistols.

- The first striker-fired pistol that combines the advantages of a SA/DA trigger with the ease of operation that only hammerless weapons can offer
- No exterior hammer to snag on clothing
- Fewer parts for increased reliability, more compact size and superior durability
- Simple disassembly and reassembly without the need for tools
- Ambidextrous magazine catch for improved magazine changes

P99

Safety first

P99 with Anti-Stress Trigger Mechanism

The principle of the anti-stress trigger mechanism makes the P99 one of the safest guns in the world. The objective is to prevent unintentional firing by reflex in situations of extreme stress. The decisive innovation is that the trigger travel before the first shot has been increased, not only in double-action firing (Pos. 1, DA), but also in single-action firing (Pos. 1, SA). The trigger travel of 14 mm, before the first shot is fired, makes unintentional firing virtually impossible. Short trigger travel for rapid bursts of fire (Pos. 2, SA) with a linear rise in trigger pull. This means excellent control of the pistol if several shots are fired in rapid succession.

P99

Cal. .40 S&W, 12-shot	Part no. 263 74 21

Anti Stress Trigger Mechanism

	Trigger pull	Trigger travel
Position 1: Double Action (DA), decocked	40 N / 4000 g	14 mm
Position 1: Single Action (SA), before first shot, manually cocked	20 N / 2000 g	14 mm
Position 2: Single Action (SA), following first shot, auto cocked	20 N / 2000 g	5 mm

P99 QA Quick Action

The P99 QA is a P99 that has been developed to meet the demands of Special Response Units. The new Quick Action trigger offers a consistent trigger pull from the first until the last shot. Once the P99 QA has been loaded it is immediately combat ready while maximizing safety for the operator through four independent safety systems. With the QA trigger, the striker is in a precocked position (approx. 6 mm / 0.24 inch) and further trigger pull results in additional cocking of approx. 3 mm (1/8 inch) before discharge. Trigger travel is about 7 mm (0.27 inch) with a trigger weight of approximately 3200 g (6.5 lbs). The always safe but short trigger travel guarantees the shooter immediate and precise shot delivery, the decisive factor in defensive situations.

The decocking lever was reduced in size to eliminate unintentional decocking of the striker. For disassembly or safe storage purposes, the decocking lever can be depressed with either a tool or your finger.

P99 QA

Cal. .40 S&W, 12-shot	Part no. 264 86 44

Trigger Pull / Trigger Travel

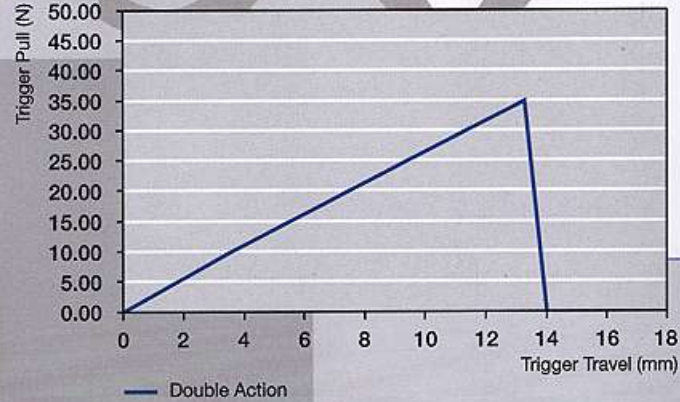

P990

Double Action Only

P990 DA ONLY

The Double Action Only trigger system ensures a consistent trigger weight of about 3500 g (7.7 lbs) with a trigger travel of about 14 mm (0.55 inches), from the first until the last shot. Three automatic safety systems eliminate the possibility of a discharge unless the trigger is pulled completely rearward. The DA Only trigger system allows the P990 to be carried safely in a loaded and combat ready condition.

P22 – makes “fun shooting” an experience!

Action, fun, sport, racing and high velocity denote modern leisure activities.

The compact design and style of a modern defense pistol in caliber .22 l.r. with all the advantages of its larger counterpart, provide for a platform from which one can inexpensively train as well as enjoy. Based on a modular assembly concept, the P22 system makes it possible to interchange equipment.

The barrel can easily be changed, and by installing the optional base mount, a point sight can be fitted.

- Optimal hand conformity via an interchangeable backstrap
- Compact design and light weight by means of a modern polymer frame (only 480 g incl. magazine)
- Single- and Double Action
- All control elements on left and right side
- Internal trigger lock, loaded chamber indicator, magazine disconnect, firing pin and drop safety provide the utmost protection against accidents
- Modern and innovative design
- Higher accuracy because the barrel is fixed to the frame
- Precise aiming is achieved by means of an adjustable rear sight and interchangeable front sights with contrasting dots
- By simply changing the barrel, a Standard or a Target version is possible

P22 Standard

Barrel 87 mm

Part no. 265 92 39

P22 Target

Barrel 127 mm

Part no. 265 92 55

The P22 Target uses the same technology as the P22 Standard, however the barrel length is now 127 mm / 5" (therefore extending the line of sight by 40 mm). The longer sight radius provides for more concentrated aiming during target shooting, ergo resulting in better scores. The P22 Target also is equipped with a barrel weight / non functional compensator.

Conversion Unit Target

Cal. .22 l.r.

Part no. 265 93 01

The P22 Standard with its short barrel can be converted to a Target version with a 127 mm match barrel and barrel weight. This change can be performed in seconds.

Conversion Unit Target

Cal. .22 l.r.

Part no. 265 92 98

Makes the conversion from the Target into the Standard version possible.

P22

PPK PPK/S

Classic Among Autoloading Pistols

Walther PPK

Since 1931, the PPK has revolutionized the pistol market with its advanced mechanics and sleek design. In December 1999 Germany stopped production of the PP series. However, both models continue to be available from our USA production line.

- Firing Pin Safety
- Manual Safety Lever, Decocker
- Double- and Single Action Trigger
- Extended Beaver Tail
- Windage Adjustable Rear Sight
- PPK: 6-shot caliber 9 mm short (.380 ACP)
7-shot caliber 7.65 mm (.32 ACP)
- PPK/S: 7-shot caliber 9 mm short (.380 ACP)

P5 Compact

Cal. 9 mm x 19, 8-shot	Part no. 247 66 22
------------------------	--------------------

Sturdy police pistol with double action trigger, that will also get the private firearms owner enthusiastic. Proved safety system with four automatic safety locks, that are also active when uncocking through the decocking lever.

P88 Compact

Cal. 9 mm x 19, 14-shot	Part no. 261 62 20
-------------------------	--------------------

Compact model, is provided with a manual safety on both sides and three automatic safety locks as well as the proved double action trigger.

P88

P5

Collector Line

P99 Year 2000

Cal. .40 S&W

Part no. 264 84 07

The P99 YEAR 2000 — IS LIMITED TO JUST 2000 SPECIAL EDITION PIECES WORLDWIDE.

The high polished blued slide is elegantly lasered, outlined and engraved with the numbering "2000 0001 of 2000" indicating the special edition. The guns will be supplied in a high-quality plastic case together with an original certificate and a video documentation.

PP/PPK Last Edition

Mod. PP, cal. 7.65 mm (.32 ACP)

Part no. 264 83 51

Mod. PPK, cal. 9 mm short (.380 ACP)

Part no. 264 83 69

Exklusive – to the last detail

For the large number of Walther enthusiasts all over the world we offer a range of special models. For that special Walther Collector, hand and laser engraved models can be individually produced. The current Collector Line includes:

P99 Oak Leaf

Cal. 9 mm x 19

Part no. 263 91 81

The detailed hand engravings make every P99 an unique work of art for experts and collectors.

P99 Arabesk

Cal. 9 mm x 19

Part no. 263 92 03

For SEVENTY YEARS NOW THE PP/PPKs HAVE BEEN CONSIDERED TO BE THE HANDGUNS OF CHOICE FOR LAW ENFORCEMENT, PERSONAL USE AND COLLECTORS.

Especially for the gun collectors all over the world the last 500 pieces have been designed as commemorative "Last Editions": high polished, with the engraving "Last Edition" on the slide. Delivery in a special gun case together with a video about the history of Walther.

LG300 Alutec

Precision has a new dimension

LG300 ALUTEC

The future of sport shooting begins with the LG300. By intelligently combining know-how, innovative technology, and the experience of successful top sportsmen, a new breed of air gun was created that sets new standards: perfect ergonomics, new materials, and no detectable recoil. That's why the LG300 Alutec is the ideal gun for all marksmen who are aiming for the ultimate.

- New recoil absorber
- 300 bar compressed air technology
- Carbon fiber barrel jacket
- Individually adjustable aluminium stock
- Individually establishable center of gravity / distribution of weight

Absorber

The recoil dampener reduces gun movement to a non-perceptible level.

LG300

Alutec

Pistol grip

The Walther pistol grip is the first grip that can be turned, pivoted, and shifted in every direction. It is available in three different sizes (Small/Medium/Large) for right handed shooters, and in Medium for left-handers.

Cheekpiece

Developed in accordance with the state-of-the-art in ergonomics, the cheekpiece can be continuously adjusted in all directions.

Carbon fiber barrel jacket

Forearm

For the first time the forearm can be shifted by 5° so that the angle of tilt (cant) in the firing position can be adjusted to suit the individual shooter.

MEC-Contact II Butt plate

An individually adjustable and continuously tiltable butt plate.

LG300

LG300 Alutec

Right, Medium grip

Part no. 264 60 56

LG300 with laminated wood stock

Right

Part no. 264 97 56

Barreled action, trigger, and sights same as model Alutec, except stock is laminated wood with rubber butt plate.

Additional model versions: Left

LG300 with beech stock

Universal ambidextrous

Part no. 265 95 90

Barreled action, trigger, and sights same as model Alutec, but beech stock with rubber butt plate.

Alutec

LG210

LG210

The successful compressed air gun. Particularly suited for clubs, an ideal instrument for sport shooting.

- Robust, from compressed air independent cocking lever
- Even, mechanical "Diabolo" loader
- Easy to cock because of optimal cocking mechanics
- Cocking lever with recoil safety

LG210 blue laminated wood stock

Right, with light metal butt plate Part no. 263 32 05

Additional model versions:

- Blue laminated wood stock, left, with light metal butt plate
- Blue laminated wood stock, right, with rubber butt plate
- Blue laminated wood stock, left, with rubber butt plate
- Ambidextrous beech stock, with rubber butt plate

LG210 Junior Beech

Ambidextrous, with rubber butt plate Part no. 263 32 56

LG300 Field Target Air Rifle "Dominator"

With higher velocity against metal silhouette targets.

- 16 or 21 (F.A.C. required in U.K.) joules muzzle energy combined with outstanding accuracy
- Adjustable forearm
- Extra long dove tail for scope mount

LG300

LG300 Dominator with aluminium stock

16 joules	Part no. 266 49 33
21 joules	Part no. 266 49 41

LG300 Dominator with laminated wood stock

16 joules	Part no. 266 50 18
21 joules	Part no. 266 50 26

Small-bore Rifles

KK200 Power Match

The KK Rifle Power Match has fore stock elevation capability, in order to achieve more height in the prone and kneeling position, if required. The equipment includes a sight line extension tube of 250 mm (9.8") length and an iris disc with color filter which is screwed into the match diopter.

- Individually adjustable aluminium stock
- Anatomically shaped grips in three sizes
- Mechanical or optional electronic trigger
- Excellent shooting performance

KK200 Sport

Right, with mechanical trigger	Part no. 263 15 39
Right, with electronic trigger	Part no. 264 00 15

KK 200 Sport

High-precision gun, developed especially for the "sporting rifle" event, with a weight of 5.7 kg (201 oz.), technical same as KK200 Power Match.

KK200 Sport

KK200 Power Match

KK200 Power Match

With mechanical trigger	Part no. 263 18 06
With electronic trigger	Part no. 264 07 16

KK100

Marksman, who are not top-ranked competitors, are often not in a position to spend a lot of money for a sporting rifle.

The alternative: The new, very reasonable KK100 Standard. It meets all requirements of a match gun and is an ideal gun for clubs.

- Adjustable double-pull trigger
- Bull barrel
- Optional right or Universal ambidextrous wood stock

KK100

Right	Part no. 264 46 09
Universal ambidextrous	Part no. 266 22 81

KK100

LP300

The ultimate target air pistol technology

LP300

Accuracy, individual adjustability, recoil control – the LP300 represents the new generation of compressed air pistols. The professional technology, the innovative functionality and, last but not least, the unmistakable design make it a sport gun that can cope with the highest demands. LP 300 – the ideal gun for top performance in the shooting sports.

Absorber

LP300

Right, Medium grip

Part no. 265 34 43

Right or left version available. Dry firing mechanism for training can be set on or off without tools. The LP300 is optionally available in the grip sizes Small/Medium/Large for right handed shooters and in size Medium for left-handed shooters.

Brilliant new technology for utmost performance

Latest technological trends in the field of recoil absorption. Because of the extremely low barrel position, the barrel and wrist form one single line. Grip and trigger are fully adjustable in every direction and allow for an adaption to the individual shooter. Angular compensation ports drilled into the barrel, together with the absorber, allow for a smooth release of the shot. The integrated front sight with three different widths and rear sight with its adjustable notch allow for rapid adaptation to all different lighting conditions and other conditions on indoor and outdoor shooting ranges.

LP300

- Individually adaptable sights by means of integrated front sight and adjustable notch
- Trigger blade adjustable in every direction and height
- Grip in three sizes for right handed shooters, infinitely movable and turnable
- Compensator, absorber and separator absorb any vibration that occurs during shooting

LPM1

Right, Medium grip

Part no. 260 46 55

With its effortless compression system, the LPM1 is one of the most popular match air pistols. The universal adjustable 3D-Vario-grip and the pre-compressed cocking system make the LPM1 the ideal gun for clubs. Also available in left hand version.

LPM1

The new GSP Expert

Accuracy, optimal hand support, individual adjustment: More than 60 years experience in the field of sporting arms manufacture has enabled us to make some significant improvements to the most reliable and one of the most popular target pistols available. It has resulted in improvements in user friendliness, reduced recoil, and consistent accuracy.

Advancement through progressive technology.

Considerable improvement in accuracy because of a new barrel system and a vibration-absorbing plastic sleeve. Sights are positioned closer to the wrist which reduces aiming errors. The ergonomic grip is optimally adapted to the shooter's hand. Nitro-carbonized breech reduces friction of breech movement even when rapid fire strings are shot. Perfect tuning between shooter, pistol and ammunition is possible by means of the newly developed recoil absorber. Grip is available in right and left version.

Three different grip sizes for right-handed shooters allow for an optimum fitting to the shooters hand (for left-handed shooters only size "M").

- Recoil compensation by means of new absorber
- Successfully proven trigger mechanism
- Three calibers, one gun

GSP Expert

GSP Expert

Cal. .22 short

Part no. 261 42 60

This modern rapid-fire pistol demonstrated has extremely high reliability with many brands of ammunition fired. The ergonomic Morini-grip and the lower sight radius give support for a comfortable hold for a long period. Right grip, left grip is also available.

OSP2000

KSP200

The KSP200 has been developed for those shooters with restricted budgets, who in the past had to acquire guns without match triggers, anatomically shaped grips or matchlike precision. The KSP200 is the perfect alternative to them, as it meets all requirements for a modern target pistol which is suitable for high level competitions.

- Precision barrel 153 mm long
- Low position of the bore
- Anatomical laminated wood grip

KSP200

Cal. .22 l.r.

Part no. 263 97 77

Right, Medium grip. Available in grip sizes S/M/L for right-handed shooters and size M for left-handed shooters.

KSP200
